METHOD FOR PRODUCING COMPOSITE MATERIALS SUCH AS THERMOPLASTIC
RESINS WITH MINERAL AND/OR VEGETABLE FILLERS

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-33, drawn to a method for producing composite materials.

Group II, claim(s) 34-42, drawn to an apparatus for producing composite materials.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of a composite material of a thermoplastic resin with mineral and/or vegetable fillers is not a technical feature that defines a contribution over the prior art as evidenced by any one of English (US 6255368), Hara (EP 0439635), Turk et al. (US 5738935) or Sakai (US 5679456), all of which disclose mineral and/or vegetable fiber reinforced thermoplastic resins produced by feeding them through an extruder.
